Writing

1984: An alternate human history.

Good day, fellow readers! In this review I would love to tell you about the book that caught my attention and became my most favourite one. The „1984” by Geo. Orwell is popular novel, it is considered one of the best dystopian novels till this day. Let me tell you why I would definitely recommend it to someone interested in English history and culture.

Firstly, the story tells us about the world where tyranny and totalitarianistic system won over, people have no rights or freedom and must obey the reigning Party. It particularly takes action in the UK which now belongs to the Oceania, a unity of several world countries. Main character, Winston Smith works at the Ministry of truth, he starts to doubt the Party and its methods, he seeks the truth and wants to uncover the past history, that was long gone and erased.

Secondly, the book perfectly encapsulates all the troubles, which Party system led to, people are poor and starved, all they know is the history and truth that Party made up. Orwell did the great job on showing us the true route in English history.

In conclusion, though the plot is completely made up, its goal is to tell the readers, that human rights and history are the most valuable things, and without it, our world is doomed. It serves as a warning, Orwell hoped for the better future and we are capable of making it. Even though the novel is aimed for the mature audience, surely, most of the readers would understand its idea and make right conclusions.
